

BenQ 7350C Scanner

Company: BenQ Corporation

Designer: Manfred Wang and his team
BenQ Lifestyle Design Center

Workspace reinterpretation drives through the design of the Scanner that can work in a sitting, standing or hanging position.

BenQ aims high on enriching the users' experience and reducing the customer's learning curve all in one go. As a start, a white board or a mirror can replace the removable flip cover. At the back, a 3.5" compact disc enables driver disc storage for multiple user access. The built-in foldable leg flap at the bottom requires minimal contact area to stand on a work surface and indeed, the Scanner can be hung onto partitions that are 20 to 90mm thick.

Fit for a typical office and SOHO, the Scanner qualifies itself as a mobile, functional, and indispensable business partner.
